Picture4

二、 Operating steps:

1. Attach the shock absorbing strip to the top of the machine, align with the top edge, and cut off the extra parts(along diagonal).

2. Use a utility knife to cut out a rectangle and expose the screw holes to prepare for subsequent stacking installation.

3. Stack two units of the machine.

Note: The upper and lower holes are aligned.

4. Install the screws of both side of the machine by internal hexagonal wrench.
